PRODUCTION ENGINEER

Career Objective

Seeking an entry level position as a Production Engineer within progressive organization which would offer new challenges, and professional growth wherein my education, training and personal abilities would be truly challenged and effectively utilized.

Career Profile:

- An exceptionally professional and ethical professional, seeking and entry level position in the field of Electronic and electric engineering as Production Coordinator
- Skilled in working autonomously or in a team environment and under stringent time constraints
- Ability to identify, understand, and interpret constraints on a design in order to produce successful results
- Strong electrical and electronic aptitude
- A self-starter with the ability to work effectively in a fast-paced work environment
- Possessing excellent communication and interpersonal skills
- Goal oriented; skilled at capitalizing on opportunities and working around obstacles with the aim to accomplish required objectives
- Currently seeking a challenging opportunity within an organisation of repute which would provide scope to learn and develop as part of a fast-paced engineering team

Core Competencies:

- Design, develop, test, manufacture, and repair electrical and electronic equipment
- Converting engineering principles into effective designs
- Excellent analytical thinking with sound technical knowledge
- Sound judgment in all decision-making processes
- Leadership and team lead attributes
- Self motivated, with the ability to analyze situations and implement creative solutions
- Strong interpersonal skills built through effective communication
- Basic knowledge of electrical test methodology

Key Deliverables; Across Career Span

- Observing the operations of in house Engineers and preparing reports on the workings of power plants
- Assisting the Project Management team in installing a module to effectively eliminate frequent current loss
- Preparing and coordinating engineering reports, studies, calculations and drawings
- Assisting in the servicing, repairs and design engineering of controls systems for factory automation
- Specifying and approving the purchase of automation equipment from suppliers
- Conversant in designing and implementing custom electronic circuits for signal conditioning, data acquisition and control functioning
- Collaborating with other engineers, supervisors, assemblers, and managers
- Researching sources of components and other materials
- Proficient in testing equipment, wiring and soldering techniques
